**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Strong sun and high UV levels also likely in any brightness through the middle of the day. Therefore it is advisable to put on sun cream if spending any length of time walking or hiking on the hills.

Forecast for Monday 01 Jul 2024

Weather: Dry with clear spells overnight, before turning increasingly cloudy from the west by dawn, with outbreaks of showery rain. A band of showery rain, locally heavy, will move eastwards during Monday morning, clearing by midday. Becoming drier and brighter, with some brief sunnier spells developing in the afternoon. Turning cloudy from the west by evening, with outbreaks of patchy light rain and drizzle at times.

Maximum wind: West-northwesterly 10-15mph gusts 20-25mph

Chance of cloud-free hill tops 600m: 30% during the morning and late in the day. Generally 70% during the middle part of the day.

Low cloud and visibility: Cloud base lowering to 500m in showery rain during the morning, lifting to above the summits after midday. Then again lowering to 500m in rain and drizzle by the evening. Visibility will be poor at times, especially in low cloud and rain. Otherwise, generally good or very good visibility.

Temperature: **Valleys:** Plus 12 Celsius, becoming Plus 18 Celsius.
At 600m: Plus 7 Celsius, becoming Plus 10 Celsius.
Freezing level: Above the summits.
